

ROCKY FLATS ENVIRONMENTAL TECHNOLOGY SITE REGULATORY CONTACT RECORD

Date/Time: October 29, 2001

Site Contact(s): Dyan Foss
Phone: 7577

Regulatory Contact: James Hindman
Phone: 303-692-3345

Agency: CDPHE

Purpose of Contact: Verify adequacy of proposed process waste line flushing to meet the RCRA stable requirements.

Discussion

The 371 Project intends to flush the process waste lines to make the lines RCRA stable prior to turnover of the lines to the RISS Project; only the lines not being used by the aqueous waste treatment system will be flushed. The flushing is proposed to consist of flushing with water followed by a blowing out with air. The lines will then be isolated. James agreed that the proposed process will meet the requirements for RCRA stable. James indicated that inspections will still be required of the valve vaults to assess groundwater infiltration and pumping requirements. In addition, James indicated that he would like to see copies of the work packages that will be used during the flushing operations, when available.
